Practica 1:

```
mkdir -p ~/sync_folder

cd ~/sync_folder

touch file{1..100}.txt

rsync -avz ~/sync_folder/ usuario@servidor_remoto:/ruta/destino/

chmod +x sync_script.sh

crontab -e

touch ~/sync_folder/test_file.txt

ls /ruta/destino/
```

Practica 3:

```
sudo apt update

sudo apt install apache2 keepalived -y

echo "<h1>Este es Server1</h1>" | sudo tee /var/www/html/index.html

sudo systemctl restart apache2

sudo apt update

sudo apt install keepalived -y

sudo systemctl restart keepalived

sudo systemctl enable keepalived
```
